

Last September we all enjoyed taking part in the European Day of Languages. We learned facts about European countries and also how to speak a few words in different languages.

Year 4 enjoy learning about likes and dislikes, sports and finally what is inside a pencil case.

In year 6 this week we are using French dictionaries and our weather knowledge to try to work out some signs. Can you translate these:

sunny motorway

Frequent ice

During **Year 5** children continue their topic of Space into French. They look at wild animals and their habitats and in the summer, head off on holiday.

Year 6 begins with our town and giving directions. We also learn about the seasons and the weather before finishing the year with the Year 6 café.
